

ROBI AXIATA PLC

68 SUPERBIKES. ONE MISSION.

Leading the country’s first telecom electric Superbike fleet from Day 1. Swipe →

THE PIONEER MOVE

NOBODY DID THIS BEFORE. ROBI DID.

No company in Bangladesh had ever deployed an electric Superbike fleet for field sales and service. This is a first of its kind investment, and we made it real on the ground.

WHAT IS A SUPERBIKE?

DIGITAL SERVICE ON WHEELS.

Zero emission electric bikes carrying SIMs, service and connectivity to the last mile, from bazaar to bazaar and union to union across Chandpur.

MY ROLE AS REGIONAL LEAD

A TO Z OF 68 BIKES.

- DSO recruitment, onboarding and training
- Daily fleet movement and route planning
- Maintenance, charging and vendor operations
- Daily performance tracking and reporting

BUILDING THE TEAM

68 RIDERS. ONE FAMILY.

Recruiting, training and motivating DSOs across every thana of Chandpur, turning a fleet into a force.

SAFETY FIRST

NO HELMET, NO RIDE.

Certified helmets and protective gear handed to every single rider, because our people always come before our numbers.

ON THE GROUND

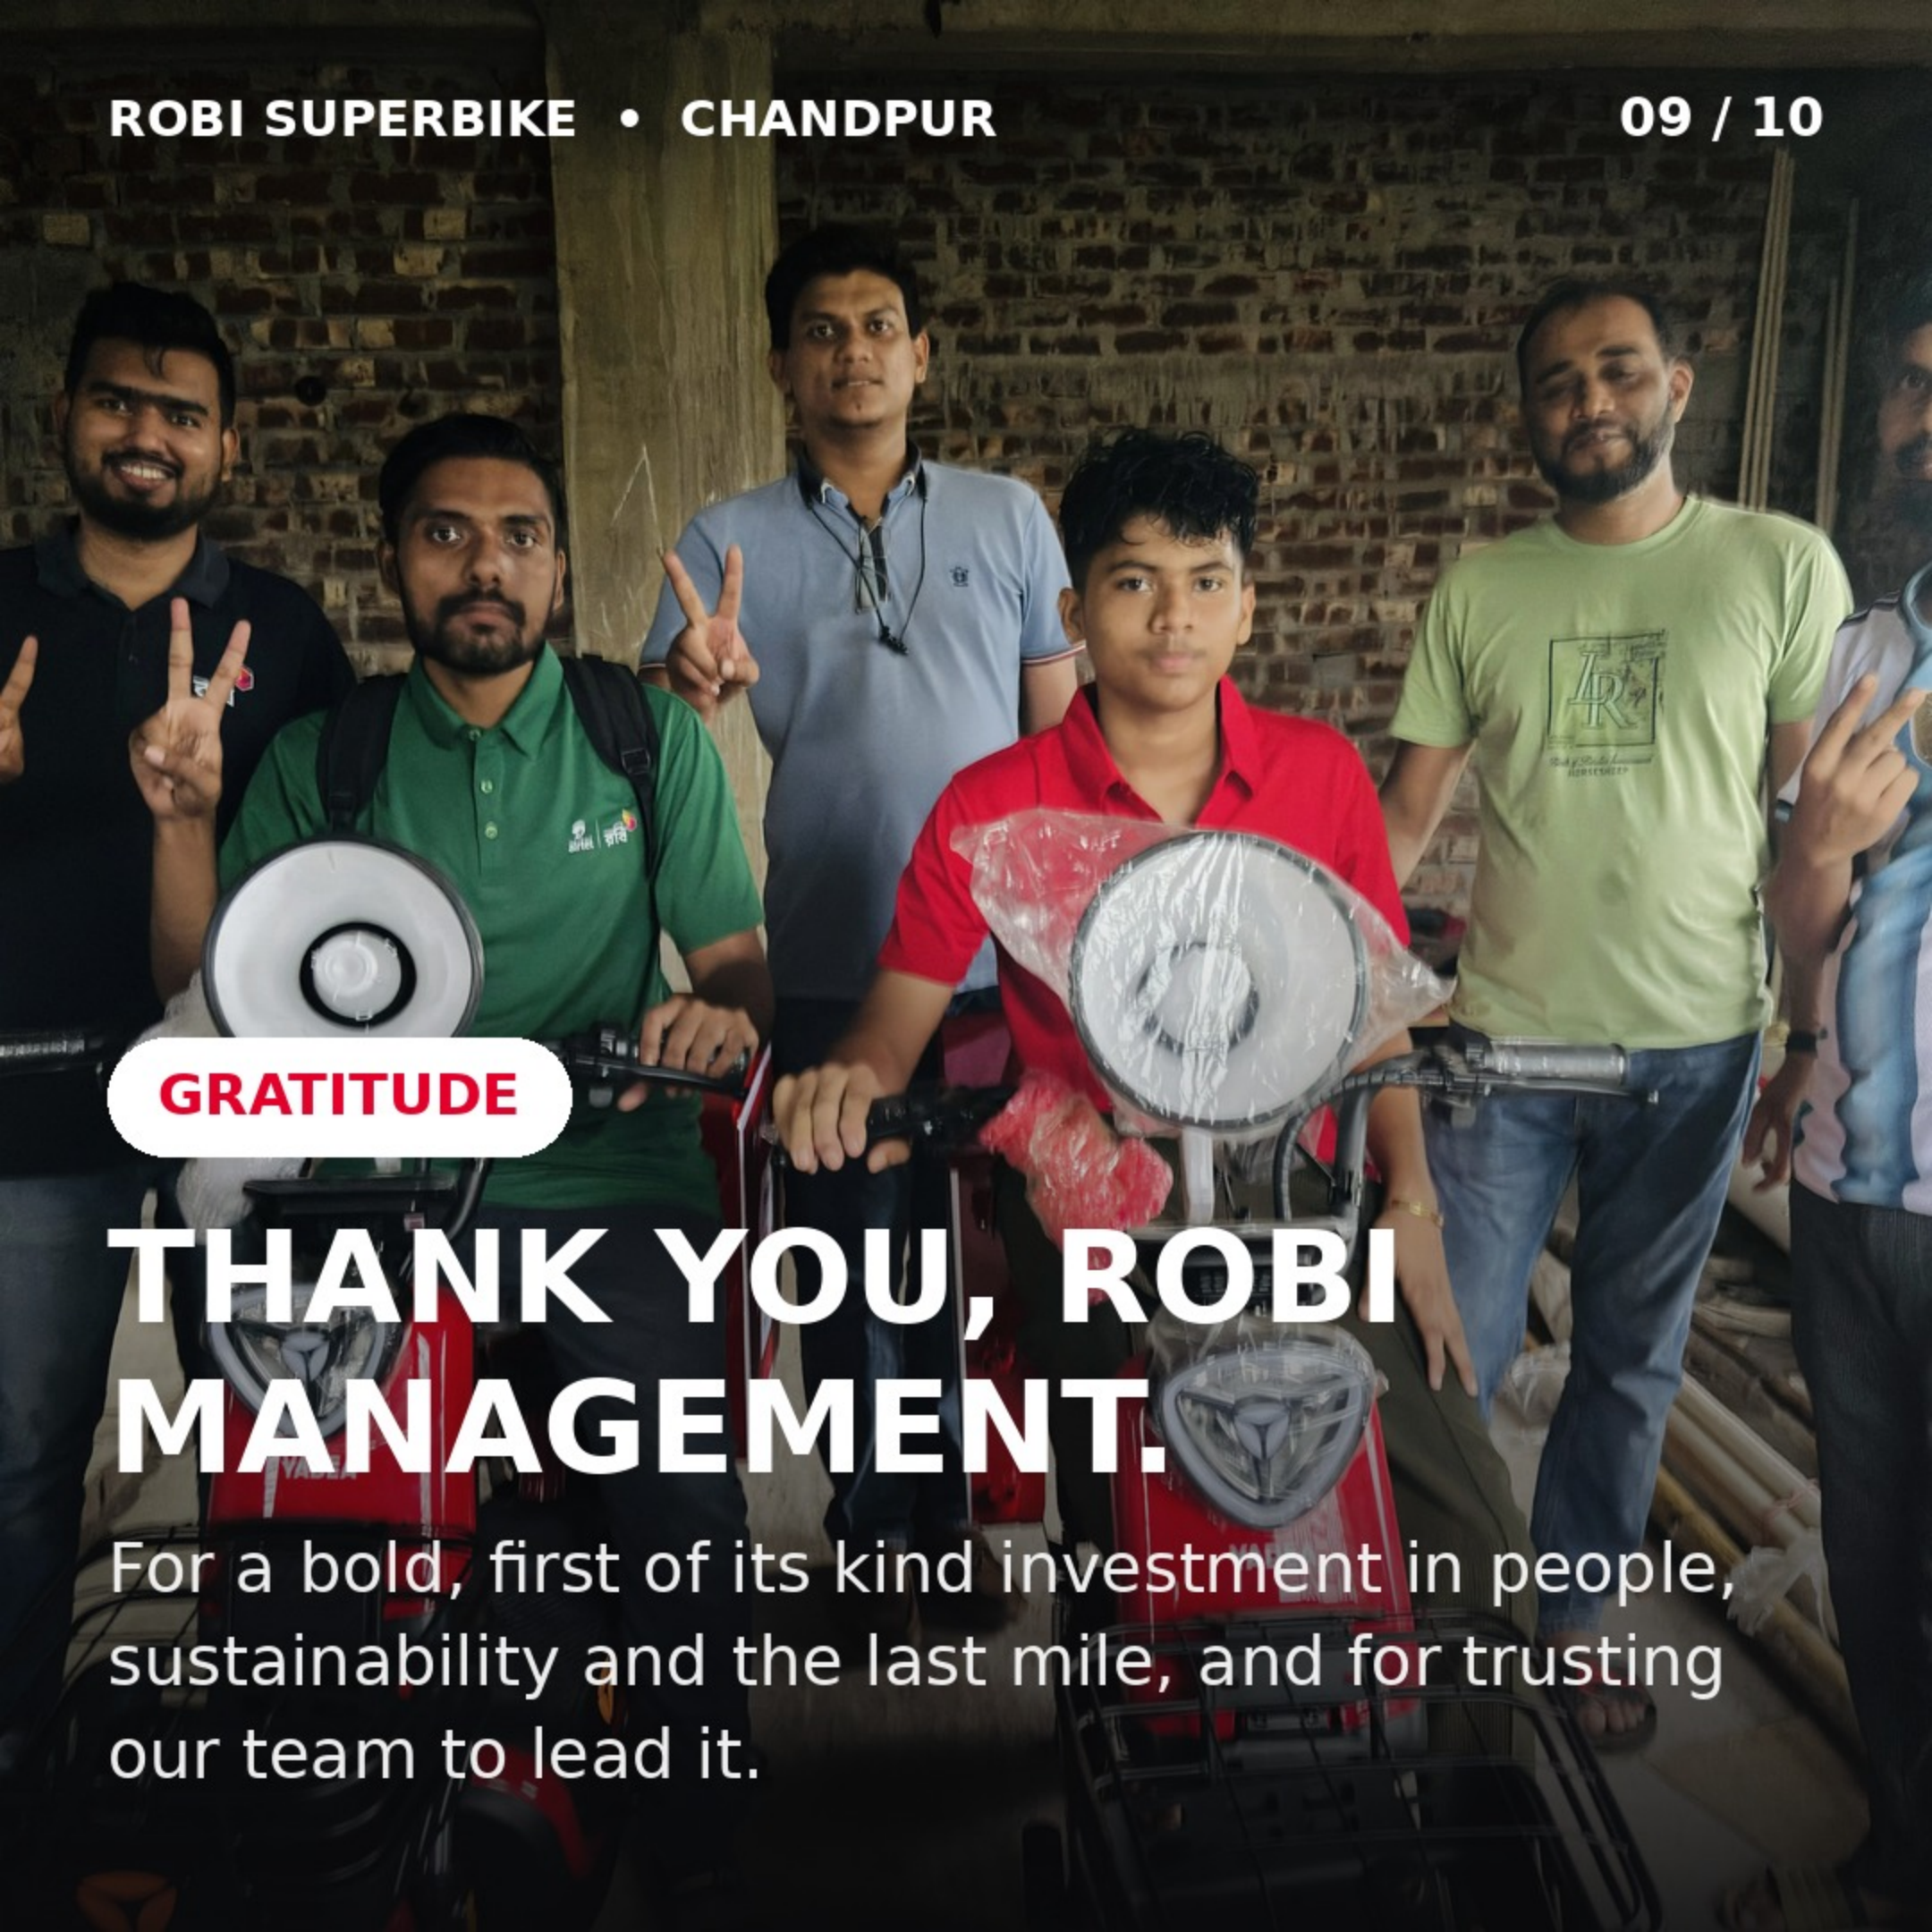

SERVICE AT THE DOORSTEP.

Daily activations at bazaars, growth centers and union points, taking Robi and Airtel to customers instead of waiting for them.

THE DAILY GRIND

EVERY SEASON. EVERY ROAD.

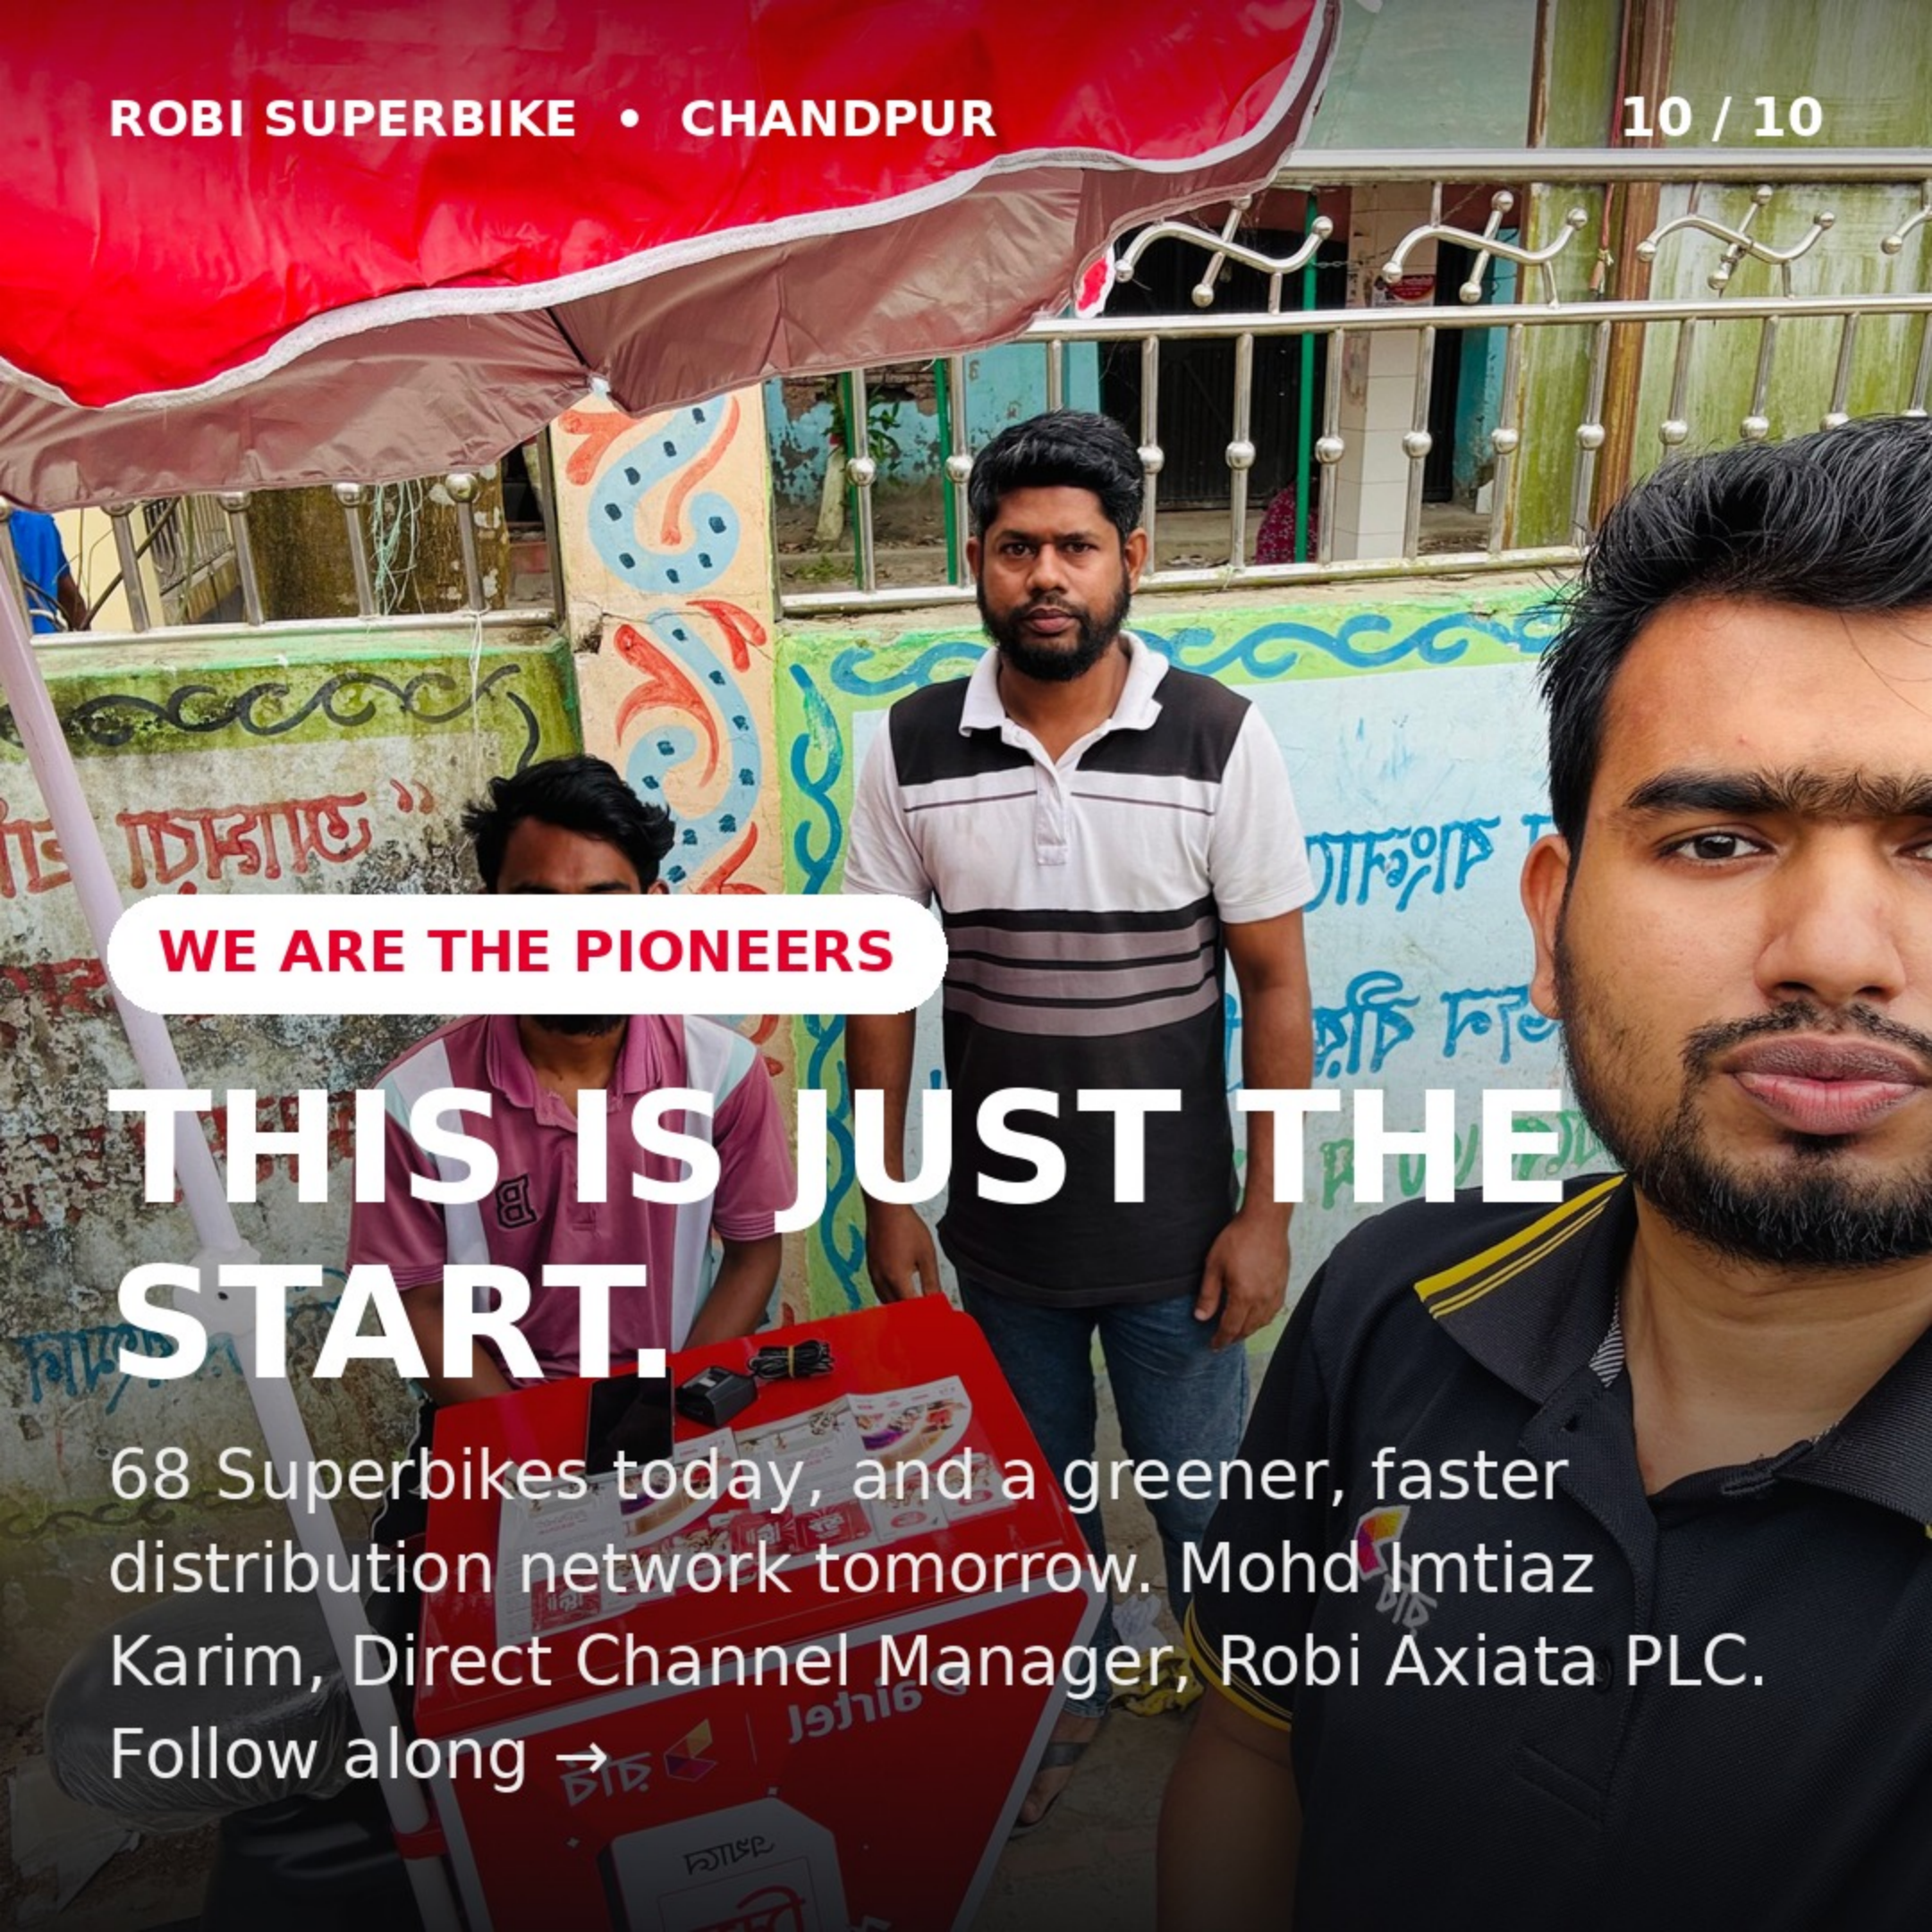

Winter fog or monsoon rain, the fleet rolls every single day. Gear checks, route discipline and vendor coordination keep all 68 bikes moving.

GRATITUDE

THANK YOU, ROBI MANAGEMENT.

For a bold, first of its kind investment in people, sustainability and the last mile, and for trusting our team to lead it.

WE ARE THE PIONEERS

THIS IS JUST THE START.

68 Superbikes today, and a greener, faster distribution network tomorrow. Mohd Imtiaz Karim, Direct Channel Manager, Robi Axiata PLC.
